Lab Task

Chalk Package

```
JS chalkjs > chalkPromise.then() callback
1  const chalkPromise = import('chalk');
2
3  // Import chalk and generate ASCII art after it is available
4  chalkPromise.then(({ default: chalk }) => {
5    const figlet = require('figlet'); // Require figlet after chalk is available
6    figlet.text('Minahil!', (err, data) => {
7      if (err) {
8        console.error('Error:', err);
9        return;
10     }
11     console.log(chalk.blue(data)); // Print the ASCII art in blue
12   });
13
14   // Print a random fortune in green
15   console.log(chalk.green('Random Fortune:'));
16 });
17
```

Random Puppy Package

```
JS fortune.js > ...
1  // Define an array of fortunes
2  const fortunes = [
3      "A beautiful, smart, and loving person will be coming into your life.",
4      "A dubious friend may be an enemy in camouflage.",
5      "A faithful friend is a strong defense.",
6      "A feather in the hand is better than a bird in the air.",
7      // Add more fortunes as needed
8  ];
9
10 // Generate a random index within the range of the fortunes array
11 const randomIndex = Math.floor(Math.random() * fortunes.length);
12
13 // Retrieve the random fortune
14 const randomFortune = fortunes[randomIndex];
15
16 // Print the random fortune
17 console.log("Random Fortune:", randomFortune);
18
```

Random Number Package

JS random.js > ...

```
9   function getRandomFloat(min, max) {
10     return Math.random() * (max - min) + min;
11   }
12
13   // Generate a random integer between 1 and 100
14   const randomNumber = getRandomInt(1, 100);
15
16   // Generate a random float between 0 and 1
17   const randomFloat = getRandomFloat(0, 1);
18
19   // Print the random number and float
20   console.log("Random Number:", randomNumber);
21   console.log("Random Float:", randomFloat);
22
```

Express Package

```
JS data.js > (⌘) port
1  const express = require('express');
2  const app = express();
3  const port = 3002;
4
5  // Define routes
6  app.get('/', (req, res) => {
7    res.send('Hello!');
8  });
9
10 app.get('/users/:userId', (req, res) => {
11   const userId = req.params.userId;
12   res.send(`User ID: ${userId}`);
13 });
14
15 // Middleware function to log requests
16 app.use((req, res, next) => {
17   console.log(`${req.method} ${req.url}`);
18   next();
19 });
20
21 // Additional routes
22 app.get('/about', (req, res) => {
23   res.send('About page');
24 });
25
26 app.post('/users', (req, res) => {
27   // Logic to create a new user
28   res.send('User created');
29 });
30
31 // Additional middleware
32 app.use(express.static('public')); // Serve static files from the 'public' directory
33
34 // Start the server
35 app.listen(port, () => {
36   console.log(`App listening at http://localhost:${port}`);
37 });
38
```
